

ACID BUND

Project: Secondary Containment

Category: Industrial

System: Rhino Linings Duraspray

Job Description

The overall project was for the Secondary Containment within a Tank Farm. Consisting of 5 Acid Tanks within a large manufacturing operation the original surface was painted in some areas but was mainly exposed concrete. The surface area was approximately 800sq metres that were coated in Rhino Linings DURASPRAY. In traffic areas 24 grit aggregate was added to assist with slip resistance.

Total job time for this project was 6 six days from start to finish and a very happy customer at the end of the job is looking for other areas of application.
