

Indigenous Housing Project

Project: Residential Project

Category: Flooring, Waterproofing

Completion

Date: 2011 - Ongoing

Product: Rhino Linings TUFF STUFF[®]
Rhino ArmaFloor 500DF[®]

Dealer: Rhino Linings Townsville

Job Description:

These purpose built homes are an innovation of Life Build, an organisation that supplies easy to erect modular homes for Aboriginal Communities in Northern Queensland and the Northern Territory.

These homes are supplied in “flat pack” panels where they can be shipped to remote locations. Depending on the availability of helpers, the module can be erected in 28 days with one qualified tradesman and approximately 15 students.

Rhino Linings products have been incorporated into the bathrooms of these modular homes to provide a seamless approved waterproof flooring system that is decorative yet durable.

Rhino Linings TUFF STUFF was used as a base coat to provide an approved waterproof seal and coated with Rhino Armafloor[®] for that decorative yet durable finish.

QBuild have been so impressed with the finish of Rhino Linings flooring they have decided, in future projects, to replace the granite shower recessed areas with Rhino ArmaFloor 500DF and increase the area to be covered from 5sqm to 23sqm per home to include a second bathroom and indoor laundry.
