

Protection for Bearing Cases

Project: Rust and Corrosion Protection for Bearing Cases

Category: Corrosion Protection

Completion

Date: November 2004

Product: Rhino Linings Duraspray

Before...

Job Description

These bearing cases are fully submerged in water. The engineering company required a solution to stop rusting and corrosion on the exterior of the casings.

The outer casing was sandblasted then primed with 251 Primer. After curing they were sprayed with Duraspray providing a completely sealed and chemical resistant lining.
