

## Containerised Chemical Storage

**Project:** Corrosions & Spill Protection

**Category:** Secondary Containment

**Completion**

**Date:** June 2010

**Product:** Rhino TUFF STUFF<sup>®</sup> & RhinoChem 2170

**Dealer:** Rhino Linings West Brisbane

### Job Description:

Rhino Linings West Brisbane was called upon to protect the complete internal surfaces of several 20ft containers from potential chemical spills and possible corrosive gas attack.

The containers were prepared with internal flat panelling and racking for shelving, the surfaces were then profiled and primed ready for the application of Rhino Linings world famous elastomeric coatings using 3mm TUFF STUFF in the work area and 3mm of RhinoChem 2170 in the other chemical storage area. Pigmented to the customers colour requirements, both areas are now easily cleaned and have years of life ahead.
