

Project: Recoating Drive Rollers

Category: Wear Protection

Completion

Date: Ongoing

Product: Rhino TUFF STUFF[®]

Dealer: Rhino Linings Kalgoorlie

Before: Uncoated Roller on right

Job Description:

The team at Rhino Linings Kalgoorlie have a close working relationship with Calcott and Downey Engineering Services (CDES) in this mining powerhouse centre.

CDES regularly overhaul conveyor system drive rollers and came to Rhino Linings Kalgoorlie to solve a coating problem on the rollers. Rubber was not working, as the time to remove and re-apply the rubber was becoming too long and expensive.

Rhino TUFF STUFF polyurethane, manufactured in Australia could be sprayed onto the roller in minutes and machined to give a perfectly round and long wearing surface.

After: Coated Roller on left
