

Gas Storage Tank

Project: Corrosion Protection

Category: Protection

Completion

Date: July 2006

Product: Duraspray

Job Description

Lanka Cables is a Copper & Iron Cable manufacturer to the export market. It is a Board Of Investment (BOI) company and the Largest Gas buyer from Lafarge Gas Company. Annual maintenance on the tanks used by this company proved costly due to down time in emptying the tanks, painting and cleaning the corrosion build up on the containers.

The tanks were sand blasted then primed with 251 Primer. Duraspray was then applied and finished with white Topcoat.

Management at Lanka Cables are very happy with the outcome, Rhino Linings has added to the company's cost saving and provided the ultimate solution for down time, even if they need to Top Coat again one day they will not need to empty the tanks due to our Linings.
