

Hydraulic Hose Sleeves

Project: Industrial Machinery

Category: Protection

Completion

Date: 2 years - ongoing

Product: RhinoGuard 2185

Dealer: Rhino Linings Westside, Sydney, NSW

Job Description:

Hydraulic hose packs on heavy machinery in the mining and earth-moving industries over time can be damaged due to abrasion while the machine is in operation. This renders the hoses as “UNSAFE”.

Rhino Linings Westside developed the technique of coating hose packs with Rhino elastomeric coatings for increased protection.

This innovative application has now been successfully utilised in field for a number of years.

Example only of hydraulic hose runs
