

MVTR Armoured Personnel Carrier

Project: Interior Protection

Category: Noise abatement, Corrosion and abrasion resistance. Flame retardant.

Completion

Date: Ongoing

Product: Rexar

Dealer: US Defence Dept and Rhino Linings

Job Description

Seen here on a rotary jig for better spraying access the Armoured Personnel Carrier is completely coated on its interior surfaces to guard against corrosion, to protect the occupants from exterior blast forces and to attenuate the over all noise generated by the operation of the vehicle. The Rexar lining also provides protection against impact, abrasion and wear on high use areas offering a hard wearing practical lining option. Rexar also offers Flame Retardant capabilities to Military Aviation standards.
