

Portable Building

Project: Portable Shower Block

Category: Waterproofing

Completion

Date: December 2006

Product: Duraspray

Job Description

This Portable Building was purposely built as a shower block and required waterproofing.

Rhino Linings was able to meet the builder's requirement by providing a product that was resistant to moisture and able to provide a seamless, crack resistant covering.

Rhino Linings Duraspray was applied with an aliphatic topcoat and anti-slip aggregate applied to the floor. After spraying the roof was coated with a white aliphatic topcoat to finish off the look.
