

## Rock Pool

**Project:** Hotel Rock Pool

**Category:** Waterproofing

**Completion**

**Date:** July 2006

**Product::** Duraspray

## Job Description

This work was done at the Kandalama Hotel, which is owned by the Aitken Spence Hotel Chain - a very upmarket and expensive hotel chain. The Kandalama Hotel is very beautiful and built near a river; it is also classified as a ECO hotel.

This rock pool is advertised as part of the hotel marketing package, but for a number of months was out of action due to water leaking from the pool into the down stairs Restaurant. The hotel chain approached Rhino Linings seeking a permanent solution to their problem.

The rock pool is part natural but also covered by black tiles. The rock, wall and floor tiles were ground and high pressure washed. The job was completed using Duraspray for its waterproofing capabilities and except for the rock area, black topcoat was applied.

The General Manager of Kandalama Hotel and Aitken Spence Board are very happy with the outcome.
