

**Project:** Town Centre Amenities Block

**Category:** Waterproofing and Flooring

**Completion**

**Date:** Mid 2012

**Product:** Rhino Tuff Stuff® & Rhino ArmaFloor®

**Dealer:** Rhino Linings Shepparton

## Job Description:

Shepparton Local Council engaged the services of Rhino Linings Shepparton to totally renovate the town centre's amenities block. Rhino Tuff Stuff polyurethane and Rhino ArmaFloor 500DF were specified due to both products durability and impact resistance.

### Rhino Tuff Stuff® Spray Applied Coating

A small atomizer was used to apply the spray applied coating on the walls, which provided an attractive fine stipple finish. The lining was then applied with Top Coat for UV resistance to prevent fading. With public amenities blocks there is always the issue of graffiti and tagging, to combat the ever-increasing problem all walls were coated with anti graffiti....making it easy for cleaners to pressure wash off any offending tags.

### Rhino ArmaFloor® 500DF

The existing floor was coated with tiles that had become cracked and broken resulting in the floor requiring surface preparation, levelling and priming prior to the application of the Rhino ArmaFloor 500DF system. Coverage consisted of grey pigment coating which was used as a base and completed with a heavy coverage of paint chip before the final coat of Rhino ArmaFloor 500 was applied.

During this project, Rhino Linings Shepparton replaced all stainless steel equipment and restored all toilet appliances. With the renovation work now complete, the amenities block provides workers with easy to clean surfaces and the community and visitors alike, convenient, clean and attractive amenities facilities.
