

## Wombat Enclosure

**Project:** Wombat Enclosure

**Category:** Flooring  
Waterproofing

**Completion  
Date:** February 2003

**System:** Rhino Linings TUFF STUFF

## Job Description

Wombats might be tough but you can't beat a Rhino!

Rhino Linings TUFF STUFF was applied to the surfaces of this wombat enclosure to provide a strong, seamless and impermeable surface.

Rhino Linings TUFF STUFF was chosen because it is easy to clean, will withstand the animals' urine acids and added an authentic appearance to the "underground" habitat.
