

Project: Qantas Defence Services Hangar

Category: Flooring

Completion

Date: June 2011

Product: ArmaFloor 300 ECO and
ArmaFloor 500 DF Polyaspartic

Dealer: Rhino Linings Westside (Blacktown, NSW)

Job Description:

When concrete floors age they become discoloured, stained, cracked, chipped, and weakened. These were the issues that Qantas Defence Services needed addressed when requesting an upgrade for the 60 year old concrete floor in the RAAF Base Richmond hangar.

The hanger, an asset of the RAAF, was refurbished utilising Rhino ArmaFloor[®] products and systems. The beauty of Rhino products is that there is no need to replace the floor, just restore it. ArmaFloor[®] 300 ECO, used as a primer and ArmaFloor[®] 500 DF Polyaspartic were used, meeting the specifications set down which included; ease of cleaning, strength, chemical resistance and an overall aesthetically pleasing professional look to the hangar floor.

Management are extremely satisfied with the end result. The completed application looks first rate.

For a decorative floor or slip resistant floor, paint chips, coloured quartz or other decorative flakes can be incorporated into Rhino ArmaFloor[®] products. Rhino ArmaFloor[®] is suitable for residential, commercial and Industrial applications.

Before: Aging concrete floor

Before: Hangar floor

During: The application process

After: The completed hangar floor
