

Internal Gutters

Project: High Rise Guttering Problems

Category: Water Proofing

Area Covered: 50m²

Completion Date: August 2005

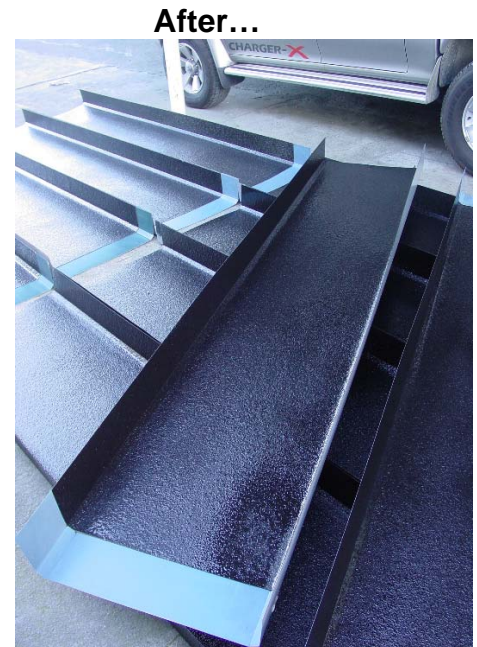

System: Rhino Linings TUFF STUFF

Job Description

This was the result on ongoing problems on a high rise building that had leaks for years. The guttering was originally coated with Butynol and had been patched over and over with no success. New gutters were formed and coated with TUFF STUFF off site, fitted and the gutter seams then recoated with TUFF STUFF – no more leaking gutters.
