

Mr Mark Teakle  
Managing Director  
Rhino Linings Pty Ltd

Nov 14, 2008

Dear Mr Teakle,

I am writing to congratulate you and your team on the outstanding work done to renovate my swimming pool and to solve associated leakage problems in the surrounding area.

I have been plagued by substantial leakage from the pool and surrounds for several years and was at the point of considering demolition before becoming aware of your spray-on linings.

I am delighted with the result. All leaks have been sealed and the spray on surface applied is very attractive and durable.

The pool, located on a difficult sloping site, has been renovated on three prior occasions by suppliers of what were essentially paint products.

These products simply did not fix the problems and I now know that I was ripped off by unscrupulous operators.

I was also impressed by the fact that your foreman spent considerable time in checking the site and coming up with the right solution.

The work done was meticulous at every stage from preparation to application of the final finish.

I would be delighted to recommend Rhino Linings products and services to any of your prospective customers.

Yours sincerely

***Rod Spence***
